

Delaware Quilts

New Year's Eve Mystery

Step Three

Now we'll start cutting. Don't try to cut them all. Start with a just a few of your favorite pairs. Even I did not cut mine all at once; I just cut a few at a time. Only after I'd made a dozen or so blocks did I start cutting a lot at a time. For the very first cut, only use one **pair** of strips.

First I made one 6 1/2 inch cut and then three 4 1/2 inch cuts. I neatly stack those pieces together and move on to the next pair to be cut.

Remember, for the first few times, until you get an idea what you are doing, we will only cut a few pairs. When you feel comfortable you can cut as many as you like.
