

Mystery # 15 Any Size You Want

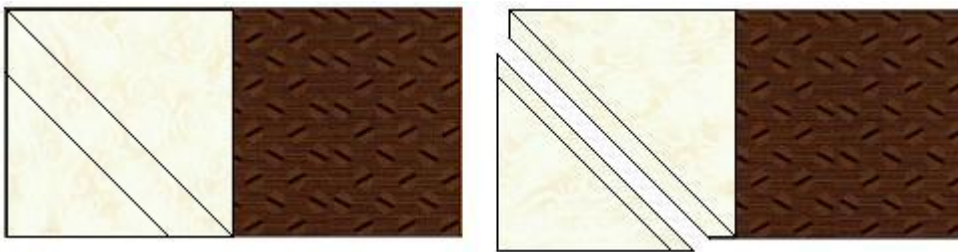

Step Two:

Place a square on the end of a rectangle, right sides together and sew from corner to corner as shown.

NOTE: If you are making a larger block, you might want to make bonus DHSs with the excess.

Mark a second diagonal line 1/2 inch away from your first line, and sew on that. Then cut between the two sewn lines, leaving a 1/4 inch seam allowance on each.

Press to the dark fabric.

Use all 64 rectangles and 64 marked squares. When this unit is finished it should be the same size as the rectangle was when you started.
